This is the latest cells from Panasonic with the highest capacity.

The cell used can be discharged down to 2.5 volt, in my test I only discharges to 2.8 volt, i.e. I do not measure the full capacity. But then, not all lights will be able to use the full capacity.

Discharge, capacity: Panasonic NCR18650B 3400mAh (Green)

These batteries are good at both low and higher current.
